Compartment Storage	Pierce® Designed Extruded Pull-out Adjustable Trays, Slide-out Tilt Trays, Tool Boards and Custom Equipment Storage Racks

APPLICATIONS

DIVE RESCUE

Custom Dive units deliver efficient, easy-to-access storage for critical equipment while maximizing space for personnel with bulky gear. Storage capacity and configuration flexibility are optimal to meet the demands of this specialized unit.

URBAN SEARCH & RESCUE

Specially designed for mitigating natural and man-made disasters. Equipment spans the spectrum in rescue and recovery, with air and hydraulic tools, winches and lifting tripods, shoring materials and cutting equipment.

BOMB RESCUE

Manage the scene and the threat of explosives. Units may include bomb retrieval robots, detonation devices, special storage, tools and ramps. Can feature command centers with radio/video equipment plus room for personnel.

HEAVY-DUTY RESCUE

Mobile equipment storage center designed to carry any and all types of tools: extrication devices, ladders, backboards, breathing air bottles, medical equipment, salvage and overhaul equipment.

HAZMAT RESPONSE

Designed for intervention of hazardous materials. Often feature a command center with vast storage for specialized suits, over-pack drums and decontamination equipment. Can include computer and weather gear, radio/video monitoring, and small labs for analyzing material.

AIR & LIGHT SUPPORT

Increase fire scene capabilities with extensive mobile breathing air and light support. Get a variety of bottle fill configurations supplied by bulk storage or endless breathing air supply through mobile compressor units. Light up the scene with fixed or articulating lights in both 120V and 12V light head configurations.

INCIDENT COMMAND

Command-style units used to manage, organize and monitor incidents for long durations. Include radio/video equipment, as well as room for personnel, food storage and conference rooms. Police, fire departments and government agencies often rely on this vehicle type.

TACTICAL RESPONSE

Designed to operate in a support function. May provide fire-ground support (personnel, salvage and overhaul equipment, additional SCBA bottles, etc.); rescue support (hydraulic or air tools, air bags, winches, etc.); and/or other specialized support (dive or ice rescue, emergency medical rescue or below-grade rescue).
