THE RESCUE - REVOLUTIONIZED

Road Rescue[®]

STREET TOUGH AMBULANCES

FOR THE MOMENTS THAT LIFE DEMANDS MORE OF YOUR FLEET

Road Rescue is the muscle in your fleet — the ambulance that defies industry standards. Built in an ISO 9001:2008 certified facility and backed by Siddons-Martin Emergency Group, Road Rescue delivers layers of rock-solid engineering to ensure your fleet is in service for life, while top-of-the-line line features revolutionize the rescue mission. There's status quo, and then there's Road Rescue for the moments when life demands more.

TOUGH, INSIDE AND OUT

MAKE ROAD RESCUE THE MUSCLE IN YOUR FLEET

REVOLUTIONARY PRECISION

Road Rescue didn't set out to make just any old ambulance. Combining REV engineering with an ISO certified factory that's brimming with the industry's most advanced equipment, extrusions are CNC sheared, for consistency and repeatability, welds are completed with T.I.G. (Tungsten Inert Gas) or M.I.G. (Metal Inert Gas) process at all intersection points.

LAYERS OF ROCK-SOLID ENGINEERING

Road Rescue's tough-as-nails exterior isn't just a façade. These ambulances are built street tough, and that durability runs layers deep. Chassis sill plates, Whisper Quiet insulation and a ladder frame subfloor creates a one-of-a-kind foundation and the ultimate road warrior.

REBEL WITH A CAUSE

Road Rescue defies all industry standards with a long list of included features that shatter the status quo, starting with the V-MUX multiplex system, which integrates multiple components through REV's own exclusive controls. The relocatable device rail lets you configure device location.

EMERGENCY OVER

LAYERS OF ROCK-SOLID ENGINEERING FOR THE BEST AMBULANCES

Peel away one layer of a Road Rescue ambulance and you'll only find another level of safety and perfection. These emergency vehicles are built with advanced engineering, provide decades of REV experience and come certified to tackle any crew — rebellious or otherwise.

CNC PLASMA LASER CUTTING

Unique CNC plasma lasers cut each extrusion for consistency and repeatability.

WELDON V-MUX MULTIPLEX SYSTEM

This electrical system uses less wiring and is easier to maintain with thorough labeling.

COOL BAR

An external air condenser mounted to the vehicle front pulls in clean air and increases airflow.

ISO 9001:2008 CERTIFIED

Each ambulance is built in an ISO certified factory that helps improve quality and lead times.

LADDER FRAME SUBFLOOR

The ladder frame subfloor structure uses extruded tubes on each aisle side for extra support.

HIDDEN HINGES

Hidden hinges create Road Rescue's sleek exterior and prevent corrosion from exposed hinges.

TOUGH-AS-NAILS RENEGADE

MAKE ROAD RESCUE THE MUSCLE IN YOUR FLEET

+ ABOUT REV GROUP

REV Group connects and protects communities with vehicles that have long served the commercial, emergency and recreation markets. Vehicles that help fight fires, transport patients, offer mobility, move freight, carry children safely to school and more.

+ SERVICE CENTERS

REV Group goes the extra mile in customer service, even after the sale. In addition to its dealer network, REV provides four regional technical centers across the nation where owners can find convenient service to keep their emergency vehicles "in service for life."

+ OUR DEALER NETWORK

With an extensive list of Road Rescue ambulance dealers and the backing of REV's far-reaching support network, buying a Type I, Type II or Type III Road Rescue ambulance is easier than ever. Which means, no emergency is ever too tough or too far away.

+ REV FINANCIAL SERVICES

Road Rescue is more than just your typical ambulance brand... it's a renegade with the backing of a \$2+ billion world-class organization. And, unlike other ambulance manufacturers, Road Rescue offers ambulance financing through REV Financial Services™.

TYPE I LINE

TOUGH-AS-NAILS AMBULANCE TRUCKS

When it comes to mission-ready performance, Road Rescue Type I ambulance trucks are the muscle that fire departments trust most when it comes to safety to and from each scene. Thanks to impeccable features built right onto Road Rescue's Ford, Chevy or Dodge ambulance chassis, each Type I delivers a tough structure, inside and out.

TYPE III LINE

THE CUTAWAY THAT IS A CUT ABOVE

Road Rescue Type III ambulances are built to deliver tough-as-nails cutaway performance for any emergency situation. These all-aluminum-constructed vehicles buck industry trends in all the right ways with eight ambulance chassis choices. Whether you're looking for a Ford ambulance or a Chevy chassis, Road Rescue delivers a long list of top-of-the-line inclusions to make this the ambulance crews salivate over.

TYPE II LINE

AMBULANCE VANS — IN SERVICE FOR LIFE

Road Rescue Type II ambulances were designed to provide a superior patient environment, while performing as highly maneuverable, on-the-go units. These units come emergency equipped, utilizing a steel roll cage and a Ford Transit ambulance chassis that's packed with top-of-the-line features inside a spacious mid- or high roof design.

MEDIUM DUTY LINE

THE MUSCLE IN YOUR AMBULANCE FLEET

Road Rescue Medium Duty Vehicles have layers of rock-solid engineering that revolutionize the way crews tackle special situations. Built on an ambulance truck chassis that includes a number of heavy-duty Ford, Chevy, Freightliner and Navistar configurations, these Road Rescue vehicles are customizable to unique specifications that deliver a lifetime of street tough performance.
