

95' HEAVY-DUTY MID-MOUNT AERIAL PLATFORM

THE LOWER RIDE TO HIGHER PERFORMANCE.

With just 9'10" of overall height, the Pierce® 95' mid-mount aerial platform is perfect for low-clearance fire stations, bridges, and other potential obstructions. And thanks to a short overall travel length of just 45', you can take this mid-mount aerial platform just about anywhere. It doesn't compromise on performance either, delivering a rated load capacity of up to 1,000 lb in winds up to 50 mph and ¼" of ice build-up.

You can get a full quint rating and haul 300 gallons of water. You are able to store up to 1,000' of hose, accessible without having to unbed the aerial device, and carry a minimum of 115' of ground ladders. The optional 10'8" overall height provides 38 more cubic feet of storage than the 9'10" overall height version.

Specifications

| | |
|----------------------------|----------------------------------|
| Custom Chassis Choices | Arrow XT™, Quantum®, Velocity® |
| Vertical Reach | 95' |
| Horizontal Reach | 88' |
| Operating Range | -8° to 75° |
