When you require maximum flexibility and strength for any situation, the versatile Type III by Wheeled Coach delivers. The multipurpose vehicle performs like a champ in virtually any environment.

The Ford chassis provides a highly functional and spacious cab layout, along with standard built-in safety features, multiple wheelbases, plus the powerful Triton V-10 gasoline engine. The Chevy chassis provides a highly functional and spacious cab layout, along with standard built-in safety features, your choice of 139" or 159" wheelbase, plus the powerful and proven Duramax diesel engine. Both at a highly affordable all-American value that can't be beat.

All of this and more, with the fastest delivery time in the industry.

Demand More. Demand Wheeled Coach.

safePASS™

Our Exclusive Exterior Compartment Patient Access Safety System

Designed specifically with your crew's safety in mind, this locking system provides improved ergonomics and protection.

Exterior door handles have large, deep wells for a firm grip even with heavy gloves. The free-floating mechanism helps eliminate wear and tear normally caused by trying to open a locked door.

And the emergency "direct release" tabs allow for doors to be opened in the event an accident has bent the door lock control rod. Other locking mechanisms can jam, making patient unloading and crew exit difficult and possibly dangerous. It's what you should expect from the number one brand in the industry.
